Parrot

Parrot
MINIKIT

High-fidelity sound

The Parrot MINIKIT is a *Bluetooth* hands-free kit. It features the very latest generation of DSP-2 signal processing algorithms and a high-definition 2W speaker for crystal clear conversations in any situation.

It follows you everywhere

It attaches to the car's sun visor and can easily be slipped into your pocket thanks to its small size and lightweight design - a mere 104g. It has its own battery, offering 10 hours talk time and over a week on standby.

It recognises your voice

The Parrot MINIKIT is designed to simplify your calls via the voice tags (max. 150/phone). It uses its own, not the phone's, voice recognition feature, thereby avoiding any need to handle the phone whilst in the car for greater safety at the wheel.

Wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices.

Phone compatibility

As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* mobile phone. Please refer to www.parrot.com

Technical and commercial specifications

Parrot MINIKIT
Compact and portable *Bluetooth* hands-free kit

Specifications
3 button user interface
2W Hi-Fi speaker
Omnidirectional **microphone**
